Language Arts

We will work on the letter 'S' and matching/identifying words that begin with 'S."

Math

We will be graphing and matching.

Science

We will learn about how shadows are made.

Home Connection

Stand outside at different times of the day and measure the length of your shadows. Why are the lengths different?

Activities

Theme: Groundhog Day and Shadows

Last week we learned about polar animals, celebrated 50 days of preschool and tested different materials to melt ice.

This week we will make a hanging sun craft and groundhog with its shadow craft. Children will take turns standing behind a sheet while the class tries to guess who is behind the sheet by seeing just their shadow. Children will use flash lights to make shadows. We will also begin our word wall this week. This week's words are: a, an, the. The word wall helps children to understand that the printed word goes with a sound.
